SUMMARY

Driven Computer Science undergraduate with a strong foundation in OOP, Data Structures & Algorithms (Top 10% globally on LeetCode), and SQL. Proven track record of building full-stack applications using Python, Java, and the MERN stack, with hands-on experience implementing Core Machine Learning and Deep Learning concepts. Adept at collaborating in Agile team environments to design, test, and deploy software solutions.

EDUCATION

University of Westminster

Sep 2024 - Sep 2028 (Expected)

BSc Computer Science — Undergraduate

Key Modules: *Object-Oriented Programming (94), Database Systems (93), Data Structures & Algorithms(91), Python Programming (96), Web Application Development (85), Mathematics (97), Machine Learning, Client-Server Computing*

Informatics Institute of Technology

Sep 2023- Apr 2024

Foundation Certificate in Higher Education (Distinction)

St. Peter's College, Negombo

Jan 2012 - Jun 2023

GCE Ordinary Level Examination (9As)

Subjects: All the core subjects and *ICT, Business & Accounting Studies and Art*

SKILLS

Languages : Python, Java, JavaScript, Rust, SQL (MySQL / PostgreSQL)

Frameworks & Runtimes : React, Node.js, Express, Flask, JAX-RS, Tauri

Databases & Cloud: MongoDB, Firebase, Google Cloud, Elasticsearch

Core Concepts: OOP, Data Structures & Algorithms, Agile/Scrum, Machine Learning, Deep Learning, Knowledge Distillation

Tools & Design: Git, Figma

PROJECTS

Mom OS | Python, Tauri, ElasticSearch, Rust

- Built a behavioral analysis system to track and evaluate user activity patterns in real time.
- Designed and implemented REST APIs to process and manage user interaction data seamlessly.
- Optimized Elasticsearch queries to improve data retrieval speeds and backend analytics performance.
- Developed a desktop interface using Tauri, integrating backend logic with a responsive frontend.

Vector Search Engine (HNSW) from Scratch | Python

- Engineered a Hierarchical Navigable Small World (HNSW) graph-based index from scratch for high-dimensional approximate nearest neighbor (ANN) search.
- Implemented multi-layer graph traversal, heuristic-based neighbor selection, and a priority-queue-backed search mechanism to optimize algorithmic efficiency.

Notewave | React, Node.js, Firebase

- Built a full-stack application combining messaging and video call features to replace fragmented solutions like WhatsApp + Zoom in online education.
 - Led a 5-member cross-functional team utilizing Agile practices to manage feature discussions and development timelines.
 - Successfully advanced to the semi-finals of Codesprintx Sri Lanka out of numerous national competing teams.
-

ACHIEVEMENTS

- Semi-finalist in Codesprintx Sri Lanka for the Notewave project. (led a 5-member team)
 - Ranked in the top 10% globally on LeetCode for competitive programming.
 - Completed Deep Learning and Machine Learning specializations by Andrew Ng.
 - Obtained Hackerank's problem solving certifications. (Beginner, Intermediate)
-

VOLUNTEERING / EXTRACURRICULAR

Environmental Prefect – St. Peter's College, Negombo | 4 years

- Led and organized school-wide environmental initiatives, promoting sustainability and awareness among students.
 - Awards: Earned 3 badges from the Central Environmental Authority of Sri Lanka for completing the required activities for each badge.
-

INTERESTS

Chess (1900 rapid in chess.com), **Competitive Programming** (LC 1700+), **Painting**
